

PUBLIC NOTICE  
IDENTIFICATION/SELECTION OF PARTNERS TO JOINTLY PURSUE FY 05 U.S.  
DEPARTMENT OF ENERGY FUNDING FOR ENERGY EFFICIENCY,  
RENEWABLE ENERGY AND ALTERNATIVE TRANSPORTATION FUEL USAGE  
PROJECTS

The Utah Energy Office is seeking proposals from potential partners for making application to the U.S. Department of Energy (DOE) under the State Energy Program (SEP) "Special Projects" solicitation <https://e-center.doe.gov/iips/faopor.nsf/Solicitation%20By%20CFDA%20Category?OpenView&Start=5&Count=30&Expand=14.18#14.18> . The DOE solicitation contains multiple program areas of interest to the Utah Energy Office that directly support the goals of promoting energy efficiency, renewable energy development, and implementation of alternative transportation fuel usage. Successful partners are required to provide cash or in-kind match as required by the DOE solicitation and program category for the amount of funding requested.

UEO is seeking to identify public and private organizations to establish partnerships for undertaking projects that meet DOE matching requirements. This request is directed to governmental entities (i.e., state, tribal, municipalities and county governments); private-sector Clean Cities stakeholders; economic development and educational institutions; energy services companies; financial institutions; utilities; private businesses; and non-profit organizations. If projects are selected for funding by DOE, the partners selected through this request will be subcontractors for project implementation. UEO plans to enter into contracts with its selected partners as a result of this request.

Proposals must be received at the UEO, 1594 West North Temple, Salt Lake City, Utah, by April 15, 2005. Request for Proposals (RFP) and program information may be requested from Denise Beaudoin at (801) 538-4798.

The State of Utah reserves the right to cancel this Request for Proposals at any time if it is in the best interest of the state.
